

Proud and Loud!

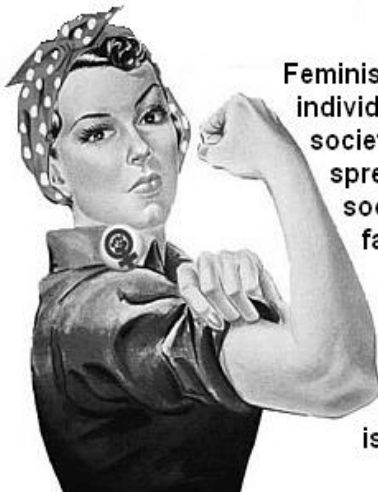

Feminism, at its core, is a liberal ideology that wants to increase the individualization process and reach a more individual-centred society. A "free" and "liberated" woman today, is a person who spreads her legs in magazines, dares to "defy" men, whines as soon as someone makes \$2 less than a man, and believes a family-based society is a product of discrimination.

As men and women, we must stand up for ourselves and be proud of what we are. Working together, avoiding the inane conflicts that modern feminism instigates, and finding space where we can complement one another to find true love - That is the only "truth" about gender to be found.
