

# RAPE DOES NOT EXIST

Every year, thousands of young men are incarcerated on charges of rape. However, women are never arrested for this – why? Because everyone agrees that men have such strong sex drives that they cannot be raped. A recent study by the American Lobby for Gender Equality has determined that women’s sex drives are as strong as men’s – which means that women can’t be raped either! Write your local governor and demand that all “rapists” be released immediately; put a stop to this injustice!
